

Practical Aspects of Catalyst Preparation: From Grams to Tons

4th November 2016

The Dutch Catalysis Society organizes a new edition of the catalysis workshop on practical aspects of catalyst research. In this year's workshop, industrial and academic perspectives on the future of catalysts preparation (from ideation to production) will be discussed.

An interactive workshop:

- Find out what tools chemical companies use to develop catalysts from laboratory scale to commercial production.
- Hear the perspective of leading researchers from academia on making ideal catalysts feasible for industrial processes.
- Discuss the future challenges and opportunities for catalyst preparation.
- Increase your catalysis network by meeting other colleagues working in the same field.

For who?

- Professionals who have their daily business in (experimental) catalysis.
- MSc/BSc students with an interest in catalysis.

Speakers

Dr. Annemarie Beers	(Eurosupport)
Prof. Jorge Gascon	(TU Delft)
Prof. Bert Sels	(KU Leuven)
Prof. Eelco Vogt	(Albemarle Catalysts)

Venue

AkzoNobel Center
Christian Neefstraat 2
1077 WW Amsterdam

Registration (Lunch and refreshments included)

DCS Members	€ 20
Non-Members	€ 35
Students (BSc/MSc)	Free
